ELSEVIER

Journal of Membrane Science 98 (1995) 302–304

journal of MEMBRANE SCIENCE

Contents

Editorial v

Gas membrane extraction of ethanol by glycols: Experiments and modelling
C. Gostoli and S. Bandini (Bologna, Italy) 1

Theoretical analysis of neutralization dialysis in the three-compartment membrane cell
G.A. Denisov (Pushchino, Russian Federation), G.A. Tishchenko (St.-Petersburg, Russian Federation), M. Bleha (Prague, Czech Republic) and L.K. Shataeva (St.-Petersburg, Russian Federation) 13

Preparation and analysis of thin polysulfone films under high and low gravitational field environments
V.D. McGinniss and R.S. Whitmore (Columbus, OH, USA) 27

Analytical approximations of the effect of a fiber size distribution on the performance of hollow fiber membrane separation devices
S. Elmore and G.G. Lipscomb (Cincinnati, OH, USA) 49

Permeators and continuous membrane columns with retentate recycle
T. Tsuru and S.-T. Hwang (Cincinnati, OH, USA) 57

Concurrent measurements of sorption and dilation isotherms and diffusivity for polysulfone membrane/carbon dioxide system
J.-S. Wang and Y. Kamiya (Ibaraki, Japan) 69

Characterisation of novel composite membrane for redox flow battery applications
T. Mohammadi and M. Skyllas-Kazacos (Kensington, NSW, Australia) 77

Pervaporation of water–ethanol mixtures through sulfonated polystyrene membranes prepared by plasma graft-polymerization
C.-D. Ihm and S.-K. Ihm (Taejon, South Korea) 89

Steady-state permeate flux of cross-flow microfiltration
D.-J. Chang, F.-C. Hsu and S.-J. Hwang (Hsin Chu, Taiwan) 97

Cake growth mechanism in cross-flow microfiltration of mineral suspensions
Y.K. Benkahla, A. Ould-Dris, M.Y. Jaffrin and D. Si-Hassen (Compiègne, France) 107

Modification of ceramic membrane surfaces using phosphoric acid and alkyl phosphonic acids and its effects on ultrafiltration of BSA protein
J. Randon (Glasgow, UK), P. Blanc (Montpellier, France) and R. Paterson (Glasgow, UK) 119

New and modified anodic alumina membranes. Part I. Thermotreatment of anodic alumina membranes
P.P. Mardilovich (Glasgow, UK), A.N. Govyadinov, N.I. Mukhurov, A.M. Rzhevskii (Minsk, Belarus) and R. Paterson (Glasgow, UK) 131

New and modified anodic alumina membranes. Part II. Comparison of solubility of amorphous (normal) and polycrystalline anodic alumina membranes
P.P. Mardilovich (Glasgow, UK), A.N. Govyadinov, N.I. Mazurenko (Minsk, Belarus) and R. Paterson (Glasgow, UK) 143

1995 Elsevier Science
SSDI 0376-7388

1995 Elsevier Science
SSDI 0376-7388

Selective CO_2 separation from CO_2/C_2H_6 mixtures by immobilized diethanolamine/PEG membranes
S. Saha and A. Chakma (Calgary, Alberta, Canada) 157
Electrochemically controlled transport in a dual conducting polymer membrane system
D. Zhou, H. Zhao, W.E. Price and G.G. Wallace (Wollongong, NSW, Australia) 173
Facilitated transport of carbohydrates via complexation with borate ion fixed on an anion-exchange membrane
M. Igawa, T. Sekimoto and H. Okochi (Yokohama, Japan) 177

Meetings calendar 181

Dehydration of water–pyridine mixture through poly(acrylonitrile-*co*-acrylic acid) membrane by pervaporation
Y.M. Lee and B.-K. Oh (Seoul, South Korea) 183
Changes in morphology and transport characteristics of polysulfone membranes prepared by different demixing conditions
M.-J. Han and D. Bhattacharyya (Lexington, KY, USA) 191
Investigation of polymer morphology of integral-asymmetric membranes by ESR and Raman spectroscopy and its comparison with homogeneous films
K.C. Khulbe, S. Gagné, A. Tabe Mohammadi, T. Matsuura and A.-M. Lamarche (Ottawa, Ontario, Canada) 201
Coarsening effects on the formation of microporous membranes produced via thermally induced phase separation of polystyrene–cyclohexanol solutions
S.-W. Song and J.M. Torkelson (Evanston, IL, USA) 209
Investigation of the permselectivity of chitosan membrane used in pervaporation separation. II. Influences of temperature and membrane thickness
G. Qunhui, H. Ohya and Y. Negishi (Yokohama, Japan) 223
Relationship between mass ratio of nonsolvent-additive to solvent in membrane casting solution and its coagulation value
D. Wang, K. Li and W.K. Teo (Singapore, Singapore) 233
Transport of vanadium(V) through a tricaprylylmethylammonium solid supported liquid membrane from aqueous acetic acid/acetate solutions
C. Palet, M. Muñoz (Barcelona, Spain), M. Hidalgo (Girona, Spain) and M. Valiente (Barcelona, Spain) 241
Fouling and retention of nanofiltration membranes
M. Nyström, L. Kaipia (Lappeenranta, Finland) and S. Luque (Oviedo, Spain) 249
Dynamic modeling of crossflow microfiltration using neural networks
M. Dornier, M. Decloux, G. Trystram (Massy, France) and A. Lebert (Ceyrat, France) 263

Short communications
Membrane-based scintillation proximity assays. I. Detection and quantification of $^{14}CO_2$
C.D. Mattingly, R.K. Mansfield, D. Bhattacharyya and M. Jay (Lexington, KY, USA) 275
Design and construction of gas permeation system for the measurement of low permeation rates and permeate compositions
A. Tabe Mohammadi, T. Matsuura and S. Sourirajan (Ottawa, Ont., Canada) 281

Rapid communication
Propylene in polyphenylene oxides membranes: unusual permeability vs. pressure behaviour
O.M. Ilinitch, A.A. Lapkin and K.I. Zamaraev (Novosibirsk, Russian Federation) 287
